Thomson Reuters Eikon brings together unique information, analytics and exclusive news on the world's financial markets. Datastream for Office's powerful charting capabilities and Office tools are now integrated and accessible alongside this intuitive market monitoring interface making it easier to stay on top of global developments, identify risks, and target the right assets, sectors and countries to invest in.

These opportunities are delivered in a user interface designed to work the way you do, with access on any device.

### BETTER CHARTS FOR THE COMPETITIVE EDGE

You can now quickly access a range of pre-built security chart studies within Thomson Reuters Eikon. A simple right click is the gateway to the power of Datastream for Office's security content sophisticated charting and publishing, and regression analysis capabilities.

### MACRO MATTERS

Datastream for Office goes beyond the security level, giving you the power to analyze top down market trends and relationships, validate trading ideas and identify opportunities. It's the historical content you need to better investigate correlations and relationships between global economic and multi asset class data.

### ALPHA GENERATING ADVANTAGES

Enjoy seamless access to our portfolio analytics capabilities, monitoring and reporting tools now available in Thomson Reuters Eikon. Access real-time market data, conduct in-depth security analysis, monitor intraday portfolio returns, generate detailed portfolio performance and attribution reports, and access a comprehensive suite of industry-leading financial data sources.

### PUBLISH YOUR IDEAS AND COLLABORATE WITH COLLEAGUES

Quickly create visually arresting presentations with our library of pre-built charts. Explore trends and correlations between series at the touch of a button with powerful annotation, formatting and publishing facilities throughout Microsoft® Office. Dynamic charts can also be sent via URL links and posted on blogs or via social media tools.

### STARMINE MODELS

StarMine's quantitative stock selection models generate alpha and save you time by summarizing key company characteristics into powerful indicators that identify opportunities and highlight potential red flags. StarMine analyst ratings identify the best sell-side analyst, the Smarholdings model ranks stocks based on the predicted future increase or decrease in institutional ownership and SmartEstimate provides a more accurate forecast than consensus.

THOMSON REUTERS™

Enhance your screen with more targeted filters across trends, sector, region and/or country.

### GENERATE IDEAS FASTER

Ease of use combined with powerful analytics will make our interactive Equity Screener your go-to solution for bottom-up analysis. You can screen on the growth or trend (including CAGR) of any numeric data item, or compare the value of each security to that of a relevant benchmark, such as a sector, country, or index. Access your saved screens or use our pre-configured screens for differentiating content and best in class analytical capabilities to generate ideas faster.

### SAVE TIME AND STAND OUT FROM THE COMPETITION WITH SEAMLESS MICROSOFT® OFFICE INTEGRATION

Having problems integrating with Microsoft® Office and want to eliminate this frustration? Datastream for Office is a single ribbon within Office applications to provide access to all cross-asset time series data for downloading into Excel, PowerPoint and Word.

### BETTER WAYS TO PRESENT THE DATA

Full Microsoft® Office integration gives you the power to create compelling models, presentations and documents. Data and charts can be linked within Excel, PowerPoint or Word so your analysis and work can be quickly refreshed with the latest data at the click of a button.

There are also sophisticated but easy to use pre-built templates to help you display and manipulate Datastream for Office content easily.

### INTEGRATE DATASTREAM FOR OFFICE INTO YOUR WORKFLOW

Access the unrivalled content of Datastream for Office in the way that works best for you, via Thomson Reuters Eikon or within Microsoft® Office applications, and utilise the tools you rely on to accomplish more.

- Powerful data analytics and download capabilities into Excel
- Easy to use, pre-formatted charts
- Tabular reports with truly flexible charting
- Dynamic delivery and updating through Excel, PowerPoint and Word
- Sophisticated analytics, function and user-created features
- Connections to MATLAB®, for financial modelling, analysis and application development, and EViews, for statistical analysis, forecasting and model simulation.
